Results-driven Back-end Developer with 5+ years of experience creating robust and efficient web applications. Strong expertise in building scalable databases and API integrations.

Adept at collaborating with cross-functional teams to analyze requirements and implement creative solutions to complex problems. Proficient in various programming languages and frameworks.

Skills:

- Programming Languages: Python, Java, C#, PHP**
- Web Development: JavaScript, HTML, CSS**
- Backend Frameworks: Django, Flask, Spring Boot, Laravel**
- Database Management: MySQL, PostgreSQL, MongoDB**
- RESTful API Development and Integration**
- Version Control: Git, GitHub**
- Test-driven Development (TDD)**
- Agile/Scrum Methodologies**
- Problem-solving and Troubleshooting**

Experience:

Back-end Developer | XYZ Tech Inc. | Anytown, USA | April 2017-Present

- Develop backend solutions and APIs for web applications using Django and Flask frameworks.
- Collaborate with front-end developers and project managers to analyze requirements and design architecture.
- Optimize database queries and improve application performance by implementing caching techniques.
- Implement secure authentication and authorization mechanisms to ensure data privacy and access control.
- Participate in sprint planning, daily stand-ups, and code reviews following Agile methodology.
- Write comprehensive unit tests to ensure code quality and facilitate continuous integration.

Junior Back-end Developer | ABC Software Corp. | Anytown, USA | July 2015-March 2017

- Assisted in building and maintaining backend systems using Java and Spring Boot framework.
- Developed RESTful APIs for communication with client applications.
- Troubleshoot and resolved issues related to database performance and data integrity.
- Collaborated with team members to implement new features and enhance existing functionalities.

- Participated in code reviews and provided constructive feedback to improve code quality.

Education:

Bachelor of Science in Computer Science | Anytown University | Anytown, USA | 2015

Personal Projects:

- **Inventory Management System:** Designed and developed a web-based inventory management system using Django and MySQL, allowing efficient tracking of stock levels, generating reports, and managing sales orders.
- **API Integration:** Created a RESTful API integration for an e-commerce website using Flask and MongoDB, enabling seamless communication with external systems for order processing and inventory updates.

Certificates:

- **Python Django Developer Certification - Codecademy**
- **MongoDB for Developers - MongoDB University**
- **Agile Software Development - Udemy**
