**Summary:**

**Highly skilled Back-end Developer with 5+ years of experience in designing and implementing scalable applications. Proficient in Java, Python, and SQL. Demonstrated expertise in developing RESTful APIs, optimizing database performance, and solving complex problems. Committed to delivering high-quality code and contributing to the success of cross-functional teams.**

**Experience:**

**Back-end Developer**

**XYZ Tech Solutions | January 2017 - Present**

- Developed high-performance web applications using Java, Spring Boot, and MongoDB.**
- Implemented RESTful APIs to enable seamless communication between front-end and back-end systems.**
- Optimized database queries and improved overall system performance by 20%.**
- Collaborated with a team of developers and agile product owners to deliver software enhancements and resolve issues.**

- Conducted code reviews to ensure adherence to coding standards and best practices.
- Mentored junior developers and provided guidance on complex technical challenges.

## **Software Engineer**

**ABC Software | June 2014 - December 2016**

- Participated in the full software development life cycle, from requirements gathering to deployment.
- Designed and developed back-end logic using Python and Django framework.
- Integrated third-party APIs to enhance application functionality.
- Collaborated with cross-functional teams to troubleshoot and resolve software defects.
- Conducted unit testing and integration testing to identify and fix bugs.
- Assisted in the maintenance and support of existing software applications.

## **Education:**

**Bachelor of Science in Computer Science**

**XYZ University | May 2014**

## **Skills:**

- Programming Languages: Java, Python
- Web Frameworks: Spring Boot, Django
- Databases: MongoDB, MySQL, PostgreSQL
- Web Services: RESTful APIs, JSON, XML

- **Version Control: Git, GitHub**
- **Problem Solving**
- **Strong Analytical Skills**
- **Team Collaboration**
- **Agile Methodologies**

#### **Projects:**

- **Created a secure authentication system using JSON Web Tokens (JWT) for a client's e-commerce website.**
- **Developed a job scheduling application that optimized resource allocation and reduced time wastage by 30%.**
- **Implemented an automated reporting system that generated daily reports based on user-specified criteria.**

#### **Certifications:**

- **Certified Java Developer (Oracle)**
- **Certified Scrum Master (Scrum Alliance)**
