Objective:
Highly analytical and results-driven Business Intelligence Developer with a strong
background in data analysis and reporting. Detail-oriented and adept at interpreting complex
data sets to drive business growth and efficiency. Seeking a challenging role where I can
utilize my skills and expertise to contribute towards the success of the organization.
Education:
Bachelor of Science in Computer Science
XYZ University, Anytown, USA (Year - Year)
Skills:

- Extensive experience with business intelligence tools (Tableau, Power BI, QlikView)
- Proficient in SQL, Python, and R for data manipulation and analysis
- Strong understanding of data warehousing concepts and ETL processes
- Excellent problem-solving and critical thinking skills
- Strong communication and interpersonal skills

Experience:

Business Intelligence Developer

ABC Company, Anytown, USA (Year - Present)

- Develop and maintain business intelligence reports and dashboards to support decision-making processes
- Gather and analyze data from multiple sources to identify trends and provide actionable insights
- Collaborate with stakeholders to understand their reporting requirements and ensure timely delivery of reports
- Perform data validation and quality checks to ensure accuracy and reliability of reports
- Optimize existing reports and dashboards to improve performance and usability
- Provide training and support to end-users on how to effectively use business intelligence tools

Data Analyst Intern

XYZ Corporation, Anytown, USA (Year - Year)

- Assisted in the development of data models and databases for reporting purposes

- Conducted data analysis using SQL to identify areas of improvement and provide

recommendations

- Created visualizations and reports using Tableau to present findings to stakeholders

- Assisted in the implementation of ETL processes to automate data extraction and loading

Projects:

1. Developed a sales dashboard using Tableau that provided real-time insights into sales

performance, helping the sales team identify opportunities for revenue growth.

2. Created a predictive model using Python to forecast customer churn, resulting in a 15%

reduction in customer attrition.

Certifications:

- Tableau Desktop Certified Professional

- Microsoft Certified: Data Analyst Associate
