Summary:

Highly motivated and detail-oriented Mobile App Developer with 3 years of experience in developing mobile applications for both iOS and Android platforms. Skilled in designing user-friendly interfaces and integrating back-end services. Strong problem-solving skills and ability to work independently or as part of a team. Passionate about staying up-to-date with the latest mobile app development trends and technologies.

Skills:

- Proficient in programming languages such as Java, Swift, and Kotlin

- Experience with mobile frameworks like React Native and Flutter

- In-depth knowledge of iOS and Android SDKs

- Familiarity with RESTful APIs and backend technologies such as Node.js and Firebase

- Strong understanding of mobile UI/UX design principles

- Ability to troubleshoot and debug mobile applications

- Excellent communication and collaboration skills

Work Experience:

Mobile App Developer | XYZ Company

June 2019 - Present

- Collaborated with cross-functional teams to gather requirements and develop mobile applications that met client specifications

- Designed and implemented intuitive user interfaces, ensuring a seamless user experience

- Integrated third-party APIs and backend services for data retrieval and storage

- Conducted testing and debugging to identify and resolve any software defects or performance issues

- Published and maintained mobile applications on Google Play Store and Apple App Store

- Continuously researched and implemented the latest technologies and techniques to optimize app performance

Junior Mobile App Developer | ABC Solutions

August 2017 - May 2019

- Assisted senior developers in the design and development of mobile applications

- Participated in code reviews and provided constructive feedback to improve code quality

- Conducted thorough testing to ensure the reliability and functionality of the applications

- Collaborated with the design team to create visually appealing and user-friendly interfaces

- Assisted in the deployment of mobile applications and provided technical support as needed

Education:

Bachelor's Degree in Computer Science | XYZ University

September 2013 - May 2017

Projects:

1. Expense Tracker App (iOS and Android)

- Developed an expense tracking application using React Native and Firebase for real-time data synchronization

- Integrated authentication and database functionalities to store and retrieve expense data securely

- Designed an intuitive user interface with interactive charts and graphs for visualizing expenses

2. Recipe Finder App (iOS)

- Created a recipe finder application using Swift and SwiftUI

- Implemented a search feature to allow users to find recipes based on ingredients or dietary restrictions

- Integrated with a third-party API to retrieve recipe data and display it in an organized and user-friendly format
