Summary:

Highly skilled DevOps Engineer with expertise in managing infrastructure, implementing automation, and optimizing deployment pipelines. Proficient in utilizing modern DevOps tools and technologies such as Docker, Kubernetes, Jenkins, and AWS. Strong collaboration and problem-solving skills with a track record of successfully delivering projects on time.

Experience:

DevOps Engineer | ABC Company

March 2018 - Present

- Implemented and managed infrastructure as code using Terraform and Ansible, resulting in 30% reduction in deployment time.

- Developed CI/CD pipelines with Jenkins for automated testing and deployment, leading to increased efficiency and improved application reliability.

- Built and deployed containerized applications using Docker and Kubernetes, reducing server costs and improving scalability.

- Collaborated with development teams to optimize application performance and troubleshoot production issues.

- Monitored and maintained cloud infrastructure on AWS, ensuring high availability and security.

Software Engineer | XYZ Corporation

May 2015 - February 2018

- Developed and maintained backend systems for web applications using Java and Spring Framework, contributing to the successful launch of multiple projects.

- Automated build and deployment processes using Jenkins, reducing manual errors and saving development hours.

- Conducted code reviews and collaborated with team members to improve code quality and maintainability.

- Assisted in the design and implementation of scalable and reliable architectures for web applications.

Education:

Bachelor of Science in Computer Science

XYZ University

September 2011 - April 2015

Skills:

- DevOps tools: Docker, Kubernetes, Jenkins, Terraform, Ansible

- Cloud platforms: AWS, Azure

- Scripting languages: Bash, Python

- Version control: Git, GitHub

- CI/CD pipeline automation

- Infrastructure as code

- Monitoring and troubleshooting

- Strong problem-solving and analytical skills

- Excellent communication and collaboration abilities

Projects:

- Personal Finance Tracker: Developed a web application to track personal finances, utilizing

Docker for containerization and Jenkins for automated deployment.

- Infrastructure Automation: Designed and implemented infrastructure automation using

Terraform and Ansible, resulting in consistent and scalable environments across

development and production.

Certifications:

- AWS Certified DevOps Engineer - Professional

- Certified Kubernetes Administrator (CKA)
