Objective:

Highly motivated and dedicated Software Quality Assurance Engineer with 5+ years of experience in both manual and automated testing. Strong expertise in developing and implementing test strategies, test plans, and test cases to ensure software quality. Utilizes comprehensive knowledge of various testing methodologies and tools to deliver reliable and efficient software solutions. Seeking a challenging position in a dynamic organization to contribute to the success of software development projects.

Education:

Bachelor of Science in Computer Science

XYZ University, City, State

Graduated: May 20xx

Skills:

- Strong knowledge of software testing methodologies, tools, and processes

- Proficient in test management and defect tracking tools (e.g., Jira, TestRail)

- Experience in both manual and automated testing using industry-standard tools (e.g., Selenium, JUnit, TestNG)

- Solid understanding of software development lifecycle (SDLC) and agile methodologies (Scrum, Kanban)

- Excellent analytical and problem-solving skills with attention to detail

- Strong ability to work collaboratively in cross-functional teams

- Familiarity with programming languages (Java, Python) and scripting languages (Shell, PowerShell)

- Good understanding of database concepts and SQL query language

- Excellent communication and documentation skills

Experience:

Software Quality Assurance Engineer | ABC Technologies, City, State | January 20xx - Present

- Develop and execute comprehensive test plans and test cases to ensure software quality for mobile and web applications

- Collaborate with cross-functional teams to identify and troubleshoot application defects

- Contribute to the design and implementation of automated tests using Selenium WebDriver and Java

- Perform regression testing on software releases to ensure existing functionalities are not affected

- Conduct performance testing and analyze system performance using tools like JMeter

- Utilize SQL queries to validate data integrity and perform database testing

- Document test results, defects, and provide recommendations for improvements

- Participate in daily stand-ups, sprint planning, and retrospective meetings

Quality Assurance Intern | XYZ Solutions, City, State | May 20xx - August 20xx

- Assisted in creating test cases and executing manual tests for web-based applications

- Recorded and tracked defects using Jira, and verified their resolution

- Collaborated with the development team to troubleshoot issues and verify fixes

- Conducted functional and regression testing on software releases

- Assisted in the creation and maintenance of test documentation

Certifications:

- ISTQB Certified Tester - Foundation Level

- Agile Certified Practitioner (PMI-ACP)

Projects:

1. Automated Test Suite Development using Selenium: Developed an automated test suite using Selenium WebDriver and Java to perform regression testing on a web application. The automated tests led to a significant reduction in manual effort and improved overall testing efficiency.

2. Mobile Application Testing: Led the testing efforts for a mobile application, including

functional testing, compatibility testing, and usability testing. The testing process involved creating test cases, executing them on different mobile devices and operating systems, and identifying and reporting defects.
